https://github.com/smit-vaghasiya-sec

- Attended regular mentor sessions and worked under guidance of senior professionals

InLighnX Global Pvt. Ltd. (December 2025 – March 2026)
Online Internship

- Completed internship training in Ethical Hacking domain
- Learned practical penetration testing and security testing concepts
- Worked on assigned tasks and real-world cybersecurity scenarios
- Improved knowledge of ethical hacking tools and methodologies

PROJECT

Munimji – Web-Based Accounting System (Oct 2023 – Feb 2024)
Team Size: 2

Developed a web-based accounting application using HTML, CSS, JavaScript, PHP, and MySQL to manage sales, purchases, ledger entries, and tax calculations. Implemented secure login authentication and automated generation of Profit & Loss, Balance Sheet, and Sale Bills. Tested and deployed using XAMPP.

Password Strength Checker Tool – Python Security Project
(Jan 2026 – Feb 2026)
Team Size: 1

Developed a Python-based password security tool to evaluate password strength based on multiple security parameters. Implemented validation checks for password length, uppercase letters, lowercase letters, numbers, and special characters using regular expressions. The tool classifies passwords into Weak, Medium, and Strong categories to promote secure password practices and improve user awareness about authentication security.
